Profile

Results-driven Full Stack Developer with hands-on experience in building and deploying modern web applications by use of React, Next.js, Node.js, Express, Prisma, MongoDB, and PostgreSQL. I develop RESTful APIs. I put into action complex CRUD operations I also create secure scalable backend systems for web applications. I have experience that proves I developed e-commerce solutions, content management systems, and admin dashboards. Can build responsive, high performance UIs with clean architecture. I have skills in frontend development. I have skills in backend development. I have skills in database modeling. I have skills in Git-based version control. I am passionate about writing high-quality maintainable code. I want to deliver value on production-ready MERN/NestJS applications.

Work Experience

MERN Stack Developer
At SyncOps

Backend Developer (Intern) SyncOps Software House

- Developing the backend for **DVOREAL**, an e-commerce platform using **NestJS, PostgreSQL, and Prisma ORM**.

- Built secure **RESTful APIs** for product, category, and user management modules.

- Implemented **database relations**, optimized queries, and improved API response performance.

- Collaborating with frontend and database teams to ensure **scalable, maintainable architecture**.

Full Stack Developer (Final Year Project)

- Designed and developed a complete **MERN stack** e-commerce application named **ShopsVilla**.

- Implemented **CRUD operations**, **authentication**, **cart**, and **order management** modules.

- Integrated **MongoDB** with **Express.js** for backend

Work Experience

logic and **React/Next.js** for responsive UI.

- Focused on **clean code structure**, **API integration**, and **user experience optimization**.

Frontend Developer (Personal Project) Portfolio Website

- Building a modern **portfolio website** using **Next.js** with dynamic components and responsive design.
